

ADRIAN KIM P. DE GUZMAN

+63 9202380937

Deguzmanadriankim@gmail.com

Guilid, Ligao City, Albay

PROFESSIONAL SUMMARY

Information Technology student and full-stack developer with hands-on experience across web development, mobile applications, and civic tech systems, gained through multiple IT internships, hackathon competitions, and freelance client work building custom systems. Skilled in designing and building full-stack, AI-integrated platforms end to end, from database architecture to user-facing interfaces. Combines strong problem-solving under pressure with effective remote team leadership and a consistent record as a President's and Dean's List awardee.

EDUCATION

Ligao National High School — Senior High School

2021 – 2023

Science, Technology, Engineering, and Mathematics (STEM)

- Graduated With Honors

Bicol University Polangui Campus

(Expected Graduation: 2027)

Bachelor of Science in Information Technology

- Consistent President's and Dean's List Awardee — A.Y. 2023 to Present

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML/CSS, Python, C++, C#, PHP, Kotlin

Frameworks & Libraries: React.js, Node.js, Next.js, Vite, Leaflet.js, Bootstrap

Databases & Backend: MySQL, Firebase, XAMPP, Supabase, PostgreSQL

Systems & Networking: Computer Hardware/Software Troubleshooting, System Diagnostics, Windows/OS Maintenance, IT Infrastructure Support, Cisco Packet Tracer

Tools & Platforms: Github, Figma, Google Antigravity, Canva, WordPress, Vercel, Claude, Gemini AI, ChatGPT

EXPERIENCE

Ibalong Festival Hackathon: Heroes of Innovation Challenge

August 2026

3rd Place out of 35 Teams (SARO)

Legazpi City, Albay

(Onsite)

- Collaborated with a 5-member team across a two-day onsite hackathon (The Forge and Hero's Pitch) to design, build, and pitch SARO, a civic reporting and emergency dispatch platform for Legazpi City
- Conducted problem discovery and solution design under the Bantong (Strategist) Hero Pathway, addressing real gaps in the city's emergency and hazard reporting process
- Presented the final solution at Hero's Pitch, placing 3rd out of 35 competing teams in the Ibalong Festival 2026 Heroes of Innovation Challenge

Knowles Training Institute x SSGC Group

April 2026 – June 2026

IT Intern

Singapore (Remote)

- Led the field monitoring team as Team Leader, supervising fellow interns, overseeing documentation and reporting, and coordinating the resolution of cross-departmental issue
- Built and maintained company websites using WordPress, handling full content updates, layout improvements, and digital asset integration.
- Designed high-impact social media visuals and multimedia content for the organization's international branding, collaborating effectively with interns from other departments and schools in a fully remote, multicultural environment

AI4AI Fair: Vibe Coding Competition

June 2026

1st Runner-Up (AI-Powered Rural Development Solution)

Polangui, Albay (Onsite)

- Placed 1st Runner-Up in a single-day, AI-assisted vibecoding competition, building an AI-powered solution addressing a real community problem in Albay
- Collaborated with a 4-member team to ideate, design, and develop the solution within an 8-hour window using Claude for AI-assisted coding, debugging, and refinement
- Developed SafeTrack, a zero-hosting-cost web app combining JavaScript, Leaflet mapping, and a dual-access AI chatbot for regional hazard tracking

Ollopa Corporation

August 2025 – September 2025

Programming Intern

Fairview, Quezon City (Remote)

- Applied advanced OOP concepts in a real enterprise setting, performing object-oriented analysis, design, and Java application development under industry supervision
- Designed and storyboarded game concepts, mechanics, and digital assets as part of a Game Design and Development track running alongside the Java programming immersion
- Consistently met industry-level quality standards while strengthening critical thinking, problem-solving, and professional communication skills in a fast-paced, real-world environment

NRG Info-Tech Institute, Inc. (TESDA Scholarship Program)

June 2025 – August 2025

Java Programming NC III Trainee

Ligao City, Albay (Hybrid)

- Developed and deployed applications within a structured systems development workflow, covering planning, coding, testing, and documentation phases
- Built multiple Java-based programs and mini-projects applying object-oriented programming concepts, including data handling, control structures, and modular design
- Participated in hands-on workshops, skills assessments, and project presentations with fellow trainees, demonstrating professional communication and team collaboration throughout the program

ACADEMIC PROJECTS

SARO: Unified Geo-Reporting and Municipal Emergency Dispatch Ecosystem

Web Development & Civic Tech Project | Ibalong Hackathon

- Engineered a full-stack civic reporting and emergency dispatch platform for Legazpi City using React, Supabase, Leaflet, and Gemini AI, replacing 20+ municipal hotlines with automated department routing, AI-driven hazard analytics, and hyper-local Mayon/flood GIS overlays.

ARGUSPH: Crime and Incident Reporting Platform for PNP Polangui

Civic Tech & Public Safety Project | Independent Development

- Engineered a full-stack admin dashboard and LGU mobile responder app for the PNP Polangui Municipal Police Station using React Native Expo and a Firebase/Firestore backend, integrating a Python-based facial recognition verification service on Google Cloud Run and covering crime and incident reporting, police blotter, officer rosters, and an interactive crime map.

SafeTrack: Geo-Reporting Ecosystem with Dual-Access AI Assistance for Localized Hazard Tracking

Web Development & AI Integration Project | Vibe Coding Competition Albay

- Developed a responsive geo-reporting web app using JavaScript and Leaflet for hazard tracking in Polangui, featuring a dual-access AI chatbot for conversational reporting and admin filtering with zero hosting costs.

K&A Clinic: AI-Powered Health Assistant System

Web & Mobile Development | Independent Development

- Architected a two-sided clinic system comprising a patient-facing app and a separate ka-clinic-admin management panel, built on a Firestore backend with a custom schema for patient records, and integrated an AI chatbot to handle patient-facing conversations while giving clinic staff visibility and control from the admin side

Intelligent Library Assistant for Collection Analysis and Narrative Reporting

Capstone Project | Bicol University Polangui

- Built an AI-integrated platform using PHP, JavaScript, and Firebase with Gemini Vision API for automated metadata extraction and a chatbot for natural language queries. Synchronized a React Native mobile app and PHP web module through a Firebase backend.

CERTIFICATES AND TRAININGS

- 3rd Place (SARO: Unified Geo-Reporting and Municipal Emergency Dispatch Ecosystem) – Ibalong Festival Hackathon: Heroes of Innovation Challenge (2026)
- 1st Runner-Up (AI-Powered Rural Development Solution) — AI4AI Fair: Vibe Coding Competition (2026)
- Introduction to Cybersecurity — Cisco Networking Academy (2026)
- Junior Cybersecurity Analyst — Cisco Networking Academy (2026)
- Programming (Java) NC III — TESDA Scholarship Program, NRG Info-Tech Institute, Inc. (2025)
